Sushant Kotian

Mumbai, Maharashtra

+91 9920398155 sushantkotian2@gmail.com linkedin.com/in/sushant-kotian14

Professional Summary:

Software Engineer with a strong interest in Artificial Intelligence and Machine Learning, experienced in data analysis, automation, and backend engineering. Hands-on experience with Python and SQL while working with large-scale transactional data. Actively building ML and AI solutions through Kaggle-based projects and Generative AI applications.

Experience

Software Engineer – Hitachi Payment Services *Apr 2025 – Present*

- Working in the payment domain with a focus on POS (Point of Sale) systems.
- Retrieved and analyzed transaction and system logs from POS machine databases.
- Performed validation and reconciliation of transaction data using SQL and PL/SQL.
- Developed Python-based automation scripts to improve efficiency of log certification and validation workflows.
- Ensured accuracy, consistency, and reliability of financial transaction data in a high-performance, regulated environment.
- Collaborated with QA, UAT, and business teams to support certification and issue resolution.

Skills

- *Programming:* Python, SQL, PL/SQL, Bash
- *Machine Learning:* Supervised Learning, Classification, Regression, Feature Engineering, Model Evaluation
- *Time-Series & Forecasting:* Trend & Seasonality Analysis, Lag Features, Forecast Evaluation
- *Deep Learning:* CNNs, Neural Networks
- *Generative AI:* LLM APIs, Prompt Engineering, Data-aware AI Systems
- *Libraries & Frameworks*: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, Prophet, XGBoost
- *Tools & Platforms*: Git, Docker, Streamlit, Jupyter Notebook
- *Databases*: Oracle, MySQL
- *Data Analysis*: EDA, Visualization, RMSE, MAE, Precision, Recall

Projects

LLM-Based Data Analysis Assistant (Generative AI Project)

Tech: *Python, LLM API, LangChain, Pandas, Streamlit*

- Built a Generative AI-powered assistant to perform natural language-driven data analysis on structured datasets.
- Enabled users to query datasets using plain English for trends, summaries, and insights.
- Integrated LLM responses with Python-based data processing to ensure grounded and accurate outputs.
- Developed an interactive Streamlit interface for business-oriented data exploration.

Sales Forecasting using Time-Series Machine Learning

Dataset: *Kaggle – Store Sales / Rossmann Sales*

Tech: *Python, Pandas, Scikit-learn, Prophet, XGBoost, Matplotlib*

- Developed time-series forecasting models to predict future sales using historical data.
- Performed data preprocessing, trend and seasonality analysis, and lag-based feature engineering.
- Implemented and compared forecasting approaches using Facebook Prophet and ML models (XGBoost).

- Evaluated forecast accuracy using RMSE and MAE.
- Analyzed seasonal demand patterns to support inventory and demand planning use cases.

Customer Churn Prediction using Machine Learning

Dataset: *Kaggle – Telco Customer Churn*

Tech: *Python, Pandas, Scikit-learn, XGBoost*

- Built ML classification models to predict customer churn based on demographic and usage data.
- Conducted exploratory data analysis and feature engineering.
- Tuned model hyperparameters using GridSearchCV.
- Interpreted model outputs using feature importance for business insights.

Human Emotion Detection using Deep Learning

Dataset: *Kaggle – FER2013*

Tech: *Python, TensorFlow, Keras, CNN*

- Developed a CNN-based deep learning model to classify human emotions from facial images.
- Applied data augmentation to improve model generalization.
- Evaluated performance using accuracy and confusion matrix.
- Demonstrated practical application of computer vision and deep learning techniques.

Education

Master of Science (M.Sc.) – Information Technology

Mumbai University | 2022 – 2024 | CGPA: 8.27

Bachelor of Science (B.Sc.) – Information Technology

Vande Mataram Degree College | 2019 – 2022 | CGPA: 6.78

Professional Training

Post Graduate Program in Data Science & AI ***Nettech India | 1-Year Program***

- Comprehensive hands-on training in Data Science, Machine Learning, Deep Learning, and Artificial Intelligence.
- Gained practical experience with Python and SQL for data analysis and modeling.
- Implemented supervised and unsupervised machine learning algorithms for classification and regression problems.
- Worked on deep learning models including CNNs and neural networks.
- Learned end-to-end AI model lifecycle, including data preprocessing, training, evaluation, and optimization.
- Completed multiple real-world and Kaggle-based projects as part of the curriculum.

Certifications

- Microsoft Technology Associate – Introduction to Programming using Python
- Microsoft Technology Associate – Introduction to Programming using JavaScript
- Flutter & Dart – The Complete Guide
- Complete Web & Mobile Designer (UI/UX, Figma)

Achievements

- Awarded 'Best Student of the Year' (2023, 2024) for academic excellence and leadership.
- Ranked 1st in MSc IT Semester 4 with a CGPA of 9.33.
- Delivered an inaugural speech to an audience of 2,000+ students, showcasing strong communication
- Secured 2nd place in a Computer Literacy Day quiz competition
